

Sound measurement of fluid-energy machines

Noise of Refrigeration system or heat pump unexpected?

We support the industry in its effort to develop energy-efficient refrigeration systems and heat pumps.

The ILK Dresden offers the following services for you:

We evaluate the sound power by means of sound measurements. The measurements can be carried out in a reverberation chamber, at the test rig or directly at the customer.

- sound power measurements according to DIN EN ISO 3741
- sound power measurements according to DIN EN ISO 9614 (sound intensity)
